Update on Construction Activity

To Whom It May Concern,

Razz Construction intends to keep proceeding down Preston Ave. now that the water line issue has been fixed at the corner of Gallatin and Preston. Razz appreciates those people affected for your patience!

Our progress on Wood Street should be finished on Thursday, April 8th. Razz then intends to work our way up Park Street. We will try to notify you a day in advance when we intend to disrupt access to individual residences. Please continue to be patient, and we appreciate it very much.

Also, Razz's boring subcontractor will be mobilizing to the site of their work across from the Fire Hall at 1811 W. Main Street for a boring operation there. It will be necessary to close one lane of traffic for a short period while they get unloaded and set up. Once they are unloaded there will be a shoulder closure for the duration of their work. Please use caution while travelling through this area for the next 2 – 3 weeks.

For questions, comments, or concerns, please contact Craig Gehling – Field Engineer at cell phone # (801) 558-3524.
