

**Razz Construction, Inc.**

4055 Hammer Drive

Bellingham, WA 98226

O: (360) 752-0011

To Whom it May Concern,

As many have observed, Razz Construction has been working on Side-Service hook-ups starting at Wood and working Eastward. Razz is currently working on Gallatin and Park Streets. We intend to begin working up Madison Street next week. There are a few hook-ups yet to be performed from Wood to Gallatin that we've encountered issues with, but in general, that is the direction we're heading.

Razz is also working on the service to the Elementary School, and we intend to have the bulk of that installation complete prior to the beginning of the school year. We cannot fully hook up the school until more services are hooked up in that area, so please bear with us on that one.

Finally, there is quite a bit of work Razz intends to begin on Monday, August 15<sup>th</sup>. The area that will be impacted by this activity is in the downtown area of Jefferson Street, and in the alley between Jefferson and Fulton Street. This activity is intended to be concluded in 2 weeks time.

For questions, comments, or concerns, please contact Craig Gehling – Project Engineer at cell phone # (801) 558-3524. As always, thank you for your patience!
